

Alejandro Vásquez Taborda

Software Engineer

SUMMARY

Creative, highly committed and flexible software developer extremely interested in web development. With experience in cloud infrastructure management. Skilled in both SQL and NoSQL databases like SQL Server, Oracle, Postgres, MySQL and MongoDB.

Seeking to apply my skills in a professional setting to contribute to the development of robust and scalable web applications.

WORK EXPERIENCE

Engineer Trainee I at Sophos Solutions, Medellín, Colombia

April 2023 — June 2023

- Completion of a comprehensive company training program in frontend development, focused on creating visually appealing and user-friendly web applications using tools like TypeScript, Angular and Azure DevOps

Fullstack Bootcamp at Sophos Solutions, Medellín, Colombia

October 2022 — February 2023

- Completed an intensive bootcamp focused on backend development principles and best practices. Developed a solid understanding of backend technologies, including Java, Spring Boot and RESTful APIs

Engineering Specialist at 3HTP Cloud Services, Medellín, Colombia

February 2020 — August 2022

- Managed cloud infrastructure, including databases, Virtual Machines, containerized applications, with different cloud providers, assuring availability and good performance
- Implemented ETL processes from local sources (databases, files, APIs, ...) to cloud warehouses, ensuring data consistency and performance
- Worked with the Information Security Engineering team in the identification, mitigation and remediation of security vulnerabilities, avoiding service disruptions
